

I have had major issues with my periods since I was a teenager. Even with birth control I experienced heavy bleeding and severe cramping, so much so that it kept me from living my life during those first few days. The only times I had relief was when I became pregnant and while nursing my two kids. Once my periods were back in full swing I was at my ropes end and considering a hysterectomy. That is when my Dr. suggested the Novasure procedure. I decided to go ahead with the procedure and I am ecstatic that I did. The results are amazing and I am now free to live my life without the worry of an "accident" or the onslaught of pain. The Novasure was the best alternative procedure for me and I am happy I did it. Thank you so much!!!
Michelle C.

Having the Novasure procedure has changed my life. I went from having such heavy flow that I found it difficult to leave the house to absolutely no flow at all!

Having the procedure in the doctor's office was wonderful. I was in and out without a lot of paperwork and I felt the environment was more personal.

There was some pain and down time involved but it was so worth the result.

If you would like additional comments regarding different aspects of the procedure please let me know.

You are welcome to use my first name and last name initial.

Sincerely,
Nancy K
